

HOW MANY GROUPERS INHABIT THE TAVOLARA MARINE PROTECTED AREA?

Do you know that you can identify Dusky groupers thanks to their blotches, similarly to our fingerprints?

We need to know the **MOVEMENTS** and **AGGREGATION SITES** of the **DUSKY GROUPER**, *Epinephelus marginatus*, to support its **SUCCESSFUL PROTECTION!**
HELP US to identify the groupers by sending us **YOUR PHOTOS**, also specifying **WHERE** and **WHEN** you took them!
THE MORE PHOTOS YOU TAKE, THE MORE GROUPERS WILL BE IDENTIFIED!
